PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building responsive production websites, event portals, dashboards, and API-integrated interfaces using JavaScript, HTML, CSS, and jQuery. Developed independent React and TypeScript applications featuring role-based access control, state management, real-time communication, and component testing. Skilled in performance optimization, production debugging, and client collaboration.

TECHNICAL SKILLS

Core Frontend: JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3, responsive design, accessibility (a11y)

State & APIs: Redux Toolkit, React Query, React Router, REST APIs, Axios, search/filtering/pagination

UI & Testing: Bootstrap, Tailwind CSS, React Hook Form, Zod, Vitest, React Testing Library

Tools & Production: Git, Chrome DevTools, Lighthouse, PageSpeed Insights, jQuery, Figma-to-code, ASP.NET WebForms (.aspx UI)

PROFESSIONAL EXPERIENCE

Prometheus Solutions Pvt. Ltd. | Frontend Developer | Aug 2022 - Present

- Built responsive websites, event registration portals, and admin dashboards using HTML, CSS, JavaScript, jQuery, and Bootstrap, including frontend UI integrations within ASP.NET WebForms (.aspx) pages.
- Converted Figma/design mockups into mobile-friendly interfaces; developed reusable UI components, semantic HTML, accessibility improvements, and cross-browser fixes.
- Integrated REST APIs for data retrieval and form submissions (POST/PUT/DELETE), with loading/error/empty states, search, filtering, and pagination.
- Owned frontend delivery on selected projects, developed modules in others, and coordinated client requirements, releases, and production fixes.
- Diagnosed and resolved frontend performance issues using Chrome DevTools, optimizing external dependencies and resource loading.
- Improved Google Lighthouse SEO score from approximately 30 to 70+ through metadata, heading structure, canonical URLs, XML sitemaps, JSON-LD, indexing fixes, and frontend performance improvements.

PROJECTS

EventHive | Event Management Platform | [Live Demo](#)

React, TypeScript, Redux Toolkit, React Query, React Hook Form, Zod, Firebase

- Built role-based access control for Admin, Organizer, and User workflows with protected routes and event management interfaces.
- Managed client state with Redux Toolkit and server/API data with React Query caching and loading/error handling.
- Created reusable registration forms with React Hook Form and Zod validation.

Vaani | Real-Time Communication Platform | [Live Demo](#)

React, WebRTC, PeerJS, Socket.IO, Vitest, React Testing Library

- Implemented peer-to-peer audio/video calling using WebRTC and PeerJS.
- Used Socket.IO for real-time rooms, participant coordination, and chat interactions.
- Wrote Vitest and React Testing Library tests for room creation, form validation, and popup interactions.

EDUCATION

B.Tech, Electronics & Communication Engineering | Graphic Era Hill University | 2020
